

Miami ISD Health Policies

Immunizations:

Your child's immunizations must be up to date to start school. There have been changes in the past two years. Please look on line at the website provided, check with your physician or call me concerning immunizations. When your child receives a vaccination, it is your responsibility to notify the school so your child's record can be updated. Please make arrangements to take care of this early to avoid the last minute back to school rush. Some clinics and offices may run out of the vaccines. Children will not be allowed to start school if their vaccinations are not up to date or at least being brought up to date as quickly as medically possible.

Parent Letter-2011-2012

Medications:

All medication at school must be in the original container, whether it is a prescription or over the counter.

All prescription medication must have the prescription label on the box or bottle.

A permission form must be signed for a child to receive medication at school.

Please make your child aware that if you have not brought any medication to school, they will not be receiving any.

Health Plans

If your child has any chronic or seasonal health problems please make sure it is noted on your child's health history list and that we complete a health care plan.

Health Screenings

Vision/Hearing screenings/Acanthosis checks will be in early fall.

Scoliosis checks will take place in the spring.

Head Lice:

Children are not allowed to come to school with live head lice. Nits maybe present if the child has recently been treated
